| | Examiner | Art Unit |
| | Yvonne M. Horton | 3635 |
| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | |
| Status | | |
| 1) Responsive to communication(s) filed on <u>22 March 200</u> 4. | | |

U.S. Patent and Trademark Office PTOL-326 (Rev. 1-04) Application/Control Number: 09/888,897

Art Unit: 3635

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #4,693,047 to MENCHETTI discloses the use of a stud/bridging spacing system including a plurality of spaced apart studs (14) having a web (18); wherein the system comprises a bridging member (20) for spanning the webs (18) of studs (14) and a bracket (26) attachable to the bridging member (20) and at least a notch (34) at an incline to the bridging member (20). Regarding claim 16, the bracket (44) is attached to the bridging member (20) by removable fasteners (9) disposed within the wall (3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 3635

2. Ascertaining the differences between the prior art and the claims at issue.

3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #4,693,047 to MENCHETTI. In reference to claims 6 and 11, MENCHETTI discloses the basic claimed structure except for explicitly detailing the gauge of the metal material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to select the known material suitable for the use intended as an obvious matter of design choice. For instance a heavier gauge metal is suitable for structures requiring more sturdiness; whereas other structures may require much lighter gauge metals. Regarding claims 7 and 8, it would have been obvious to one having ordinary skill in the art at the time the invention was made to select the width of the notches suitable for the use intend and the size of the bridging member as an obvious matter of design choice. Certainly, larger notches are needed to accommodate larger sized bridging member and vice-versa. In reference to claims 9 and 10, the applicant has shown no criticality for the notches being straight, parallel or angled. Hence, the selection of either would be within the general skill of a worker in the art.

Allowable Subject Matter

Claims 4,5,12-15,17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20-49 allowed.

Art Unit: 3635

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yvonne M. Horton whose telephone number is (703) 308-1909. The examiner can normally be reached on 6:30 am - 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl D. Friedman can be reached on (703) 308-0839. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
